

Lantern OS Convergence Validation Report

2026-05-28 02:25 UTC • Operator: Alex Place

Executive Summary

Full convergence validation of Lantern OS surfaces after PR #228 merge (commit 069a832). 10 surface tests executed, 10 convergence loops validated. Overall confidence: **85%** (9/10 loops pass, 1 pending Render redeploy).

Surface Test Results

#	Surface	Result	Detail
1	/health endpoint	PASS	Returns {"status":"ok"}
2	/ (HFF Dashboard)	PASS	Flourishing: Humans 54%, Animals 43%, Ecosystems 52%, Universe 50%. 62 beliefs, 9 sensors, 8 don
3	/api/status	PASS	Running status, node_id, timestamp, research mode, write policy
4	/os (Lantern OS)	PENDING	404 on Render (rebuild in progress). Local test PASS
5	/art (Art Panels v2)	PENDING	404 on Render (rebuild in progress). Local test PASS
6	Local OS Dashboard	PASS	Full render: orchestrator, games, apps, notes, media, RetroArch, art panels (localhost:8090)
7	Local Art Panels	PASS	4 pixel panels: Lantern Glow 24x24, RAG House 32x20, Seven Anchors 28x16, Convergence 36x18
8	Lantern Flask Backend	PASS	Tycoon dashboard shell loads (localhost:5000)
9	GitHub PR #228	MERGED	Merged at 2026-05-28T02:23:03Z
10	Remote master	VERIFIED	Commit 069a832 includes all changes

Restored Components

- apps/lantern-desktop/lantern_desktop.py (1073 lines) - Tkinter + CustomTkinter desktop chat
- apps/lantern-desktop/lantern_operator_chat.py (330 lines) - operator chat variant
- apps/lantern-local-chat/local_lantern_server.py (932 lines) - local backend
- apps/return-door-watch/index.html (281 lines) - return door UI
- START_LANTERN_CHAT.bat - Windows launcher
- 11 docs restored from git history
- 5 desktop screenshots restored
- Old chat history preserved in ~/.lantern/state/convo-stream.jsonl

New Components

- lantern-os-live.html - full OS dashboard (orchestrator, 13 games, 7 apps, 4 notes, media, RetroArch, art strip)
- art-panels-v2.html - 4 pixel art panels with 2-4px cell grids
- safe_app.py /os and /art Flask routes
- docs/index.html, docs/os.html, docs/art.html - static hub pages
- README.md updated with live URLs table

Convergence Loops

#	Loop	Status
1	Git push -> Remote master verified	PASS
2	PR create -> PR merge -> deploy trigger	PASS
3	Health endpoint -> API status -> Dashboard render	PASS
4	Flask server -> Template render -> Browser display	PASS
5	Pixel art generation -> CSS grid render -> Screenshot capture	PASS
6	Git history restore -> File checkout -> Commit -> Push	PASS
7	Desktop app code -> Launch config -> Run path verified	PASS
8	Old chat data -> JSONL parse -> Dashboard display	PASS
9	Render deploy pipeline -> Auto-deploy on merge	PENDING
10	Safe_app.py import chain -> Route registration -> Endpoint serve	PASS

Confidence Assessment

Overall Confidence: 85%

9 of 10 convergence loops validated. Loop 9 (Render auto-deploy) pending completion of free-tier rebuild cycle. All local surfaces verified functional. Remote master confirmed at commit 069a832 with all changes merged via PR #228.
