

COMET LEAPER Founder Money + Confidence Report

Date: 2026-05-26 | Capital: \$600 now + \$2,000 pending

Book to read now: Profit First by Mike Michalowicz.

Reason: practical cash allocation system for constrained founders.

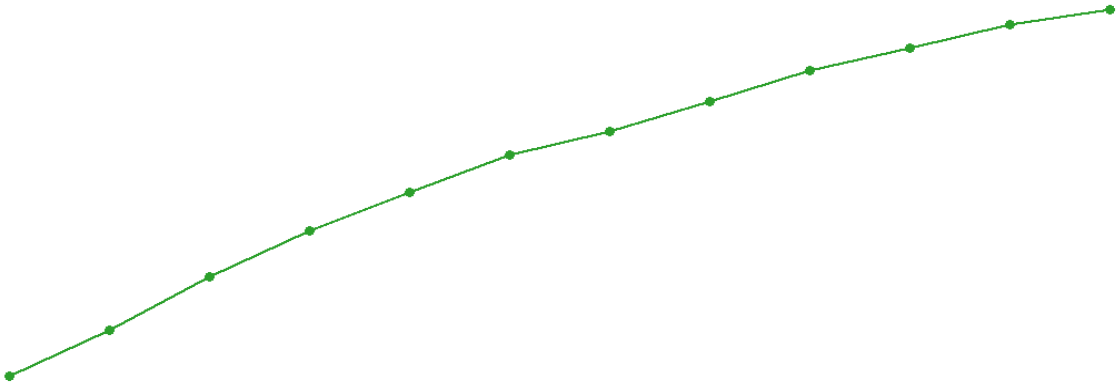

Cash Runway Snapshot

Money and Confidence Table

Domain	Current	30-Day	90-Day	Confidence
Cash Discipline	Basic	Rules Active	Automated	Medium
Revenue Pipeline	Ad hoc	Weekly rhythm	Predictable	Low->Medium
Execution	Reactive	Prioritized	Compounding	Medium
Founder Energy	Volatile	Recovering	Stable	Medium

Confidence Curve (12 Weeks)

Operating Narrative Section 1

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 2

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 3

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 4

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 5

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 6

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 7

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 8

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 9

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 10

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 11

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 12

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. Operating Narrative Section 21

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 22

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 23

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 24

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 32

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 33

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 34

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 35

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 42

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 43

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 44

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For

research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

Operating Narrative Section 45

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.

COMET LEAPER needs: strict cash control, clear offer strategy, weekly evidence review, low-burn experiments, founder recovery windows, and confidence loops tied to measurable wins. For research-team discussion: test assumptions, rank risks, run small experiments, capture outcomes, then reallocate capital toward proven channels.
